How HR Will Drive Value in 2025

In a span of less than five years the meaning of work has undergone multiple massive waves of transformation – forces that are reverberating and interacting in unprecedented ways. In this session we will discuss how HR will serve as a driver of value while our organizations navigate the uncharted waters of 2025.

Speed Debates on the Future of Work

What is your most controversial opinion on the future of work? What are the best arguments for it, and against it? In this interactive exercise, we seek to open minds and create connections by asking attendees to debate with their neighbors several thorny propositions on the future of work– and then switch sides after 60 seconds. Each topic will be revealed immediately before the debate.

In this session we will explore how organizations are assessing the risks ahead and enhancing their resilience in response.
