

FOR RELEASE: 10:00 A.M. ET, Thursday, February 20, 2020

The Conference Board®
 U.S. Business Cycle IndicatorsSM
THE CONFERENCE BOARD LEADING ECONOMIC INDEX®
(LEI) FOR THE UNITED STATES
AND RELATED COMPOSITE ECONOMIC INDEXES FOR JANUARY 2020

The Conference Board Leading Economic Index® (LEI) for the U.S. increased 0.8 percent, **The Conference Board Coincident Economic Index®** (CEI) increased 0.1 percent and **The Conference Board Lagging Economic Index®** (LAG) was unchanged in January.

- The Conference Board LEI for the U.S. increased substantially in January. Positive contributions from most components, except for the ISM® New Orders Index and average weekly manufacturing hours, fueled the most recent improvement. In the six-month period ending January 2020, the leading economic index increased 0.1 percent (about a 0.2 percent annual rate), much slower than the growth of 0.8 percent (about a 1.6 percent annual rate) over the previous six months. However, the strengths among the leading indicators are slightly more widespread than the weaknesses.
- The Conference Board CEI for the U.S., a measure of current economic activity, increased slightly in January. The coincident economic index rose 0.8 percent (about a 1.7 percent annual rate) between July 2019 and January 2020, more than twice as fast as its growth of 0.3 percent (about a 0.6 percent annual rate) over the previous six months. However, the strengths among the coincident indicators have become very widespread, with all components advancing over the past six months. The lagging economic index was flat in January, while the CEI improved. As a result, the coincident-to-lagging ratio is up slightly. Real GDP expanded at a 2.1 percent annual rate in the fourth quarter of 2019, the same pace as in the third quarter.
- The Conference Board LEI for the U.S. increased substantially in the first month of 2020. As a result, its six-month growth, which had been negative, is now slightly positive. Meanwhile, The Conference Board CEI for the U.S. continues to rise slowly and its six-month growth rate has improved. Taken together, the current behavior of the composite indexes and their components suggest that the expansion in economic activity will continue in the short-term, although at a moderate pace.

LEADING INDICATORS. Eight of the ten indicators that make up The Conference Board LEI for the U.S. increased in January. The positive contributors – beginning with the largest positive contributor – were average weekly initial claims for unemployment insurance (inverted), building permits, stock prices, the Leading Credit Index™ (inverted), average consumer expectations for business conditions, manufacturers’ new orders for nondefense capital goods excluding aircraft*, the interest rate spread, and manufacturers’ new orders for consumer goods and materials*. The negative contributor was the ISM® New Orders Index, while average weekly manufacturing hours held steady in January.

The LEI for the U.S. increased 0.8 percent in January and now stands at 112.1 (2016=100). Based on revised data, this index decreased 0.3 percent in December and increased 0.1 percent in November. Over the six-month span through January, the leading economic index increased 0.1 percent, with five out of ten components advancing (diffusion index, six-month span equals 55 percent).

COINCIDENT INDICATORS. Three of the four indicators that make up The Conference Board CEI for the U.S. increased in January. The positive contributors to the index – beginning with the largest positive contributor – were employees on nonagricultural payrolls, personal income less transfer payments* and manufacturing and trade sales*. The negative contributor was industrial production.

The CEI increased 0.1 percent in January and now stands at 107.3 (2016=100). Based on revised data, this index remained unchanged in December and increased 0.4 percent in November. During the six-month period through January, the coincident economic index increased 0.8 percent, with all four components advancing (diffusion index, six-month span equals 100 percent).

LAGGING INDICATORS. The Conference Board Lagging Economic Index for the U.S. remained unchanged at 108.7 (2016=100) in January, with three of its seven components advancing. The positive contributors to the index – beginning with the largest positive contributor – were commercial and industrial loans outstanding*, the change in CPI for services and the ratio of consumer installment credit outstanding to personal income*. The negative contributors were the average duration of unemployment (inverted) and the change in the index of labor cost per unit of output, manufacturing*. The ratio of manufacturing and trade inventories to sales* and the average prime rate charged by banks held steady in January. Based on revised data, the lagging economic index decreased 0.1 percent in December and increased 0.3 percent in November.

DATA AVAILABILITY AND NOTES.

The data series used to compute **The Conference Board Leading Economic Index®** (LEI) for the U.S., **The Conference Board Coincident Economic Index®** (CEI) for the U.S. and **The Conference Board Lagging Economic Index®** (LAG) for the U.S. and reported in the tables in this release are those available “as of” 8:30 am ET on February 19, 2020. Some series are estimated as noted below.

* Series in The Conference Board LEI for the U.S. based on our estimates are manufacturers’ new orders for consumer goods and materials and manufacturers’ new orders for nondefense capital goods excluding aircraft. Series in The Conference Board CEI for the U.S. that are based on our estimates are personal income less transfer payments and manufacturing and trade sales. Series in The Conference Board LAG for the U.S. that are based on our estimates are manufacturing and trade inventories to sales ratio, the change in labor cost per unit of output, manufacturing, consumer installment credit to income ratio, and the personal consumption expenditure deflator used to deflate commercial and industrial loans outstanding.

The procedure used to estimate the current month’s personal consumption expenditure deflator (used in the calculation of commercial and industrial loans outstanding) incorporates the current month’s consumer price index when it is available before the release of The Conference Board LEI for the U.S.

THE CYCLICAL INDICATOR APPROACH. The composite economic indexes are the key elements in an analytic system designed to signal peaks and troughs in the business cycle. The leading, coincident, and lagging economic indexes are essentially composite averages of several individual leading, coincident, or lagging indicators. (See page 3 for details.) They are constructed to summarize and reveal common turning point patterns in economic data in a clearer and more convincing manner than any individual component—primarily because they smooth out some of the volatility of individual components.

Historically, the cyclical turning points in The Conference Board LEI for the U.S. have occurred before those in aggregate economic activity, while the cyclical turning points in The Conference Board CEI for the U.S. have occurred at about the same time as those in aggregate economic activity. The cyclical turning points in The Conference Board LAG for the U.S. generally have occurred after those in aggregate economic activity.

U.S. Composite Economic Indexes: Components and Standardization Factors

<u>Leading Economic Index</u>	<u>Factor</u>
1 Average weekly hours, manufacturing	0.2796
2 Average weekly initial claims for unemployment insurance	0.0325
3 Manufacturers' new orders, consumer goods and materials	0.0838
4 ISM® new orders index	0.1568
5 Manufacturers' new orders, nondefense capital goods excl. aircraft	0.0411
6 Building permits, new private housing units	0.0292
7 Stock prices, 500 common stocks	0.0394
8 <i>Leading Credit Index</i> TM	0.0820
9 Interest rate spread, 10-year Treasury bonds less federal funds	0.1139
10 Avg. consumer expectations for business conditions	0.1417
<u>Coincident Economic Index</u>	
1 Employees on nonagricultural payrolls	0.5297
2 Personal income less transfer payments	0.2053
3 Industrial production	0.1449
4 Manufacturing and trade sales	0.1201
<u>Lagging Economic Index</u>	
1 Inventories to sales ratio, manufacturing and trade	0.1270
2 Average duration of unemployment	0.0364
3 Consumer installment credit outstanding to personal income ratio	0.1824
4 Commercial and industrial loans	0.0930
5 Average prime rate	0.3021
6 Labor cost per unit of output, manufacturing	0.0503
7 Consumer price index for services	0.2088

Notes:

The component factors are inversely related to the standard deviation of the month-to-month changes in each component. They are used to equalize the volatility of the contribution from each component and are “normalized” to sum to 1. When one or more components are missing, the other factors are adjusted proportionately to ensure that the total continues to sum to 1.

These factors were revised effective with the release in January 2020, and all historical values for the three composite economic indexes were revised at this time to reflect the changes. (Under normal circumstances, updates to the leading, coincident, and lagging economic indexes only incorporate revisions to data over the past six months.) The factors for The Conference Board LEI for the U.S. were calculated using May 1990-December 2018 as the sample period for measuring volatility. A separate set of factors for the February 1959 - December 1977, January 1978 - December 1983 and January 1984 – April 1990 periods are available upon request. The primary sample period for the coincident and lagging economic indexes was February 1959 – December 2018. For additional information on the standardization factors and the index methodology see: “Benchmark Revisions in the Composite Indexes,” *Business Cycle Indicators* December 1997 and “Technical Appendix: Calculating the Composite Indexes” *Business Cycle Indicators* December 1996, or the Website: <http://www.conference-board.org/data/bci.cfm>

The trend adjustment factor for The Conference Board LEI for the U.S. is -0.0798 (over the 1984 – present) and 0.0932 (over the 1959-1983 period), and the trend adjustment factor for The Conference Board LAG for the U.S. is 0.1457.

To address the problem of lags in available data, those leading, coincident and lagging indicators that are not available at the time of publication are estimated using statistical imputation. An autoregressive model is used to estimate each unavailable component. The resulting indexes are therefore constructed using real and estimated data and will be revised as the unavailable data during the time of publication become available. Such revisions are part of the monthly data revisions, now a regular part of the U.S. Business Cycle Indicators program. The main advantage of this procedure is to utilize in the leading economic index data such as stock prices, interest rate spread, and manufacturing hours that are available sooner than other data on real aspects of the economy such as manufacturers’ new orders. Empirical research by The Conference Board suggests that there are real gains in adopting this procedure to make all the indicator series as up-to-date as possible.

NOTICES

The Conference Board Leading Economic Index® (LEI) for the U.S. news release schedule for 2020:

Thursday, January 23, 2020	For December 2019 data
Thursday, February 20, 2020	For January 2020 data
Thursday, March 19, 2020	For February 2020 data
Friday, April 17, 2020	For March 2020 data
Thursday, May 21, 2020	For April 2020 data
Thursday, June 18, 2020	For May 2020 data
Thursday, July 23, 2020	For June 2020 data
Thursday, August 20, 2020	For July 2020 data
Friday, September 18, 2020	For August 2020 data
Thursday, October 22, 2020	For September 2020 data
Thursday, November 19, 2020	For October 2020 data
Friday, December 18, 2020	For November 2020 data

All releases are at 10:00 AM ET.

** Statistical Imputation (See page 3 for more details)

© The Conference Board 2020. All data contained in this table are protected by United States and international copyright laws. The data displayed are provided for informational purposes only and may only be accessed, reviewed, and/or used in accordance with, and the permission of, The Conference Board consistent with a subscriber or license agreement and the Terms of Use displayed on our website at www.conference-board.org. The data and analysis contained herein may not be used, redistributed, published, or posted by any means without express written permission from The Conference Board.

COPYRIGHT TERMS OF USE. All material in this data table, this press release, and on Our Sites are protected by United States and international copyright laws. You must abide by all copyright notices and restrictions contained in Our Sites. You may not reproduce, distribute (in any form including over any local area or other network or service), display, perform, create derivative works of, sell, license, extract for use in a database, or otherwise use any materials (including computer programs and other code) in this data table, this press release, and on Our Sites (collectively, "Site Material"), except that you may download Site Material in the form of one machine readable copy that you will use only for personal, noncommercial purposes, and only if you do not alter Site Material or remove any trademark, copyright or other notice displayed on the Site Material. If you are a subscriber to any of the services offered on Our Sites, you may be permitted to use Site Material, according to the terms of your subscription agreement.

TRADEMARKS. "THE CONFERENCE BOARD", the TORCH LOGO, "THE CONFERENCE BOARD LEADING ECONOMIC INDEX", "THE CONFERENCE BOARD COINCIDENT ECONOMIC INDEX", "THE CONFERENCE BOARD LAGGING ECONOMIC INDEX", and any other logos, indicia and trademarks featured in this data table, this press release, or on Our Sites are trademarks owned by The Conference Board, Inc. in the United States and other countries ("Our Trademarks"). You may not use Our Trademarks in connection with any product or service that does not belong to us or in any manner that is likely to cause confusion among users about whether The Conference Board is the source, sponsor, or endorser of the product or service, nor in any manner that disparages or discredits us.

Violators of these rights will be prosecuted to the full extent of the law. Nothing herein shall restrict the use of the information by news journalists using the information in a legitimate news publication or periodical.

U.S. Composite Economic Indexes (2016=100)

Peak:	60:4	69:12	73:11	80:1	81:7	90:7	01:3	07:12
